

## A/C ACCESSORIES

The **UNIVERSAL MOUNTING PLATE** allows you to mount our Enclosure Air Conditioner to your enclosure when you have used another manufacturer's unit.

When your Enclosure Air Conditioner has lived its useful life, you could spend more time sourcing the exact unit than simply replacing it with a ISC model.

### With ISC you get:

- Condensate boil-off built in standard on every unit
- All digital controller with alarming and protection circuits
- 1,000 BTUH to 24,000 BTUH units available
- Full compressor cycling and hi/low pressure protection standard on every unit

### The ISC Universal Mounting Plate Includes:

- Mounting hardware for air conditioner to universal plate and plate to enclosure
- Pre cut (NEMA Type 12) or mounted (NEMA Type 4) gasket for air conditioner to plate and rolled gasket to install on universal plate to enclosure
